

## PROFILE

Looking for a challenging role in a reputable organization to utilize my technical, and non-technical skills for the growth of the organization as well as to enhance my knowledge and many skills about new and emerging trends in the IT.

I'm an AI and Data science enthusiast, as well as I love to work on complex problems because that keeps me more active.

I have capability to delve into the new leading Technologies and ability to work well in both a team environment and an individual environment.
